

# GCEA

## GREEN POWER PROGRAM

### INVEST IN CLEAN, RENEWABLE ELECTRIC POWER!

Through a partnership with Tri-State Generation and Transmission, GCEA members are able to contribute, at an additional cost, towards energy that is produced by sources of renewable generation.

Green power can be purchased for only \$0.12 per 100 kWh block.

GCEA's new program will allow Members to offset 100% of monthly usage with green power. With this option, the green power fee will be calculated each month based on kWh usage. 100 kWh blocks of green power are available to our Members as well. Charges for green power are in addition to the regular monthly energy charge.
